EXPERIENCE

Lamination Depot   💻   March 2018 - Current
Web Developer
- In charge of all webstore responsibilities, including configuration, product setup, third party integrations, design, and analytics.
- Customize the UI/UX of the entire e-commerce webstore using the **Netsuite SCA platform**, **Handlebars.js**, **Sass**, and **Backbone.js**.
- Ensure customer feedback is interpreted and integrated into the webstore.

The HackHive   💻   March 2018 - Current
React Developer
- Help develop core user facing features using **React.js, Redux,** and **Sass**.
- Integrate UI designs into reusable components.
- Work with other engineers to build and ship components efficiently.

APPLICATIONS DEVELOPED

Axolotl   live | github
- A social media messaging application geared towards positive communication between friends.
- Independent mobile and desktop versions designed using **HTML**, **CSS3**, **JavaScript**, **AJAX**, **jQuery,** and **Smarty.**
- Backend developed using Python, Bottle, and SQL.

Westworld Draw   live | github
- A multi-level memory match game with a western twist.
- A **mobile responsive** solo project built in **React** and styled with **CSS3**.
- Compiled using **npm** and **Webpack**.

Final Transmissions   live | github
- An augmented reality storytelling application that renders 3D objects to the user's phone and tells a story based on proximity to a predetermined location.
- Responsible for developing a **mobile responsive UI** using **HTML**, **Pug**, **CSS3**, **vanilla JavaScript**, **Axios**, and **noSleep.js**.
- Backend developed using **Node.js** and **MySQL**.
- Augmented reality created using **CSS3**, **AR.js**, and **A-frame**.

EDUCATION

University of Missouri – BS in Business Administration
LearningFuze – Accelerated Web Development Program
